

CHRISTIAN ABIODUN ADEMOLA

Nairobi, KENYA +254701043776

ABOUT ME

I am Christian Abiodun Ademola, a seasoned and versatile Full Stack Software Developer with strong expertise across both the **MEAN stack** and the **Microsoft .NET ecosystem**, and a track record of building and deploying end-to-end software solutions that solve real-world problems and meet enterprise-level standards.

My journey began with extensive hands-on experience in modern JavaScript-based frameworks, where I developed and deployed full-stack applications using **Angular**, **Node.js**, **Express.js**, **TypeScript**, and **Redux**, supported by solid skills in HTML, CSS, JSON, and RESTful API integration. During this period, I completed several freelance and personal projects—ranging from task managers and e-commerce pages to property management systems—all of which strengthened my understanding of asynchronous web programming, API consumption, user-centric design, and dynamic front-end architecture.

Over time, my commitment to professional growth led me to advance into the enterprise software domain, where I embraced the **Microsoft .NET stack**. I am currently a key developer at **Sunpro Systems Limited**, where I play a critical role in engineering core modules of an enterprise-grade **Human Capital Management System (HCMS)**. My responsibilities include designing, developing, and maintaining systems such as **Staff Management**, **Promotion Tracking**, **Contract Lifecycle**, and **Bank Change Automation**, all of which integrate directly with payroll, leave, performance appraisal, and self-service platforms used across multiple sectors including healthcare, banking, and logistics.

At Sunpro, I leverage a modern and scalable technology suite comprising **C#**, **ASP.NET Core**, **Blazor**, **MudBlazor**, **Entity Framework Core**, **Syncfusion**, and **MariaDB**. I design modular, component-based user interfaces that deliver intuitive user experiences while ensuring performance and accessibility. On the backend, I implement clean, RESTful services backed by robust database design and optimized query strategies, following domain-driven design and SOLID principles to ensure maintainable and testable systems.

Beyond technical expertise, I bring strong communication skills, client-focused thinking, and a relentless drive to innovate. Whether delivering freelance projects, collaborating on team systems, or pushing performance improvements in live enterprise deployments, I remain committed to solving business problems through technology. With a deep foundation in both **JavaScript** and **.NET**, I offer a unique hybrid of frontend finesse and backend reliability positioning me to contribute to complex, scalable, and mission-critical software ecosystems.

EXPERIENCE

FEBRUARY 2025- PRESENT

SOFTWARE DEVELOPER

SUNPRO SYSTEMS LIMITED

OCTOBER 2024 - NOVEMBER

ENUMERATOR

MINISTRY OF LABOR AND SOCIAL PROTECTION

SEPTEMBER 2023 - OCTOBER

SOFTWARE DEVELOPER AND A FREELANCE DEVELOPER

MAY 2023 -AUGUST 2023

ATTACHMENT IN THE SOS KENYA ORGANISATION

MARCH 2023 - MAY 10th 2023

I WAS AT THE JITU COMPANY IN NYERI KDS FOR THE 2023 COHORT

NOV 2022 - FEBRUARY 2023

FREELANCE DEVELOPER AND A STUDENT AT MURANG'A UNIVERSITY

JAN 2022- SEPT 2022

SOFTWARE DEVELOPER

I have done some of web projects using JavaScript JSON HTML and CS like
"STREAKS APP"

.

AUGUST 2022 - END OF MAY

IT CLERK IN THE KENYA IEBC AND TRAINEE, KENYA YOUTH EMPLOYMENT & OPPORTUNITIES PROJECT

A transformational project that aims to empower and uplift the well-being of the youth in Kenya by equipping them with essential training, internship, and business grant opportunities.

JAN 2019 - START OF PANDEMIC

SUBSTITUTE TEACHER, INGRID EDUCATION CENTER

EDUCATION

2021 - 2024 APRIL

BACHELOR OF SCIENCE INFORMATION TECHNOLOGY

MURANGA UNIVERSITY OF TECHNOLOGY

2016 -2019

KCSE, KIAMWANGI HIGH SCHOOL

Scored a mean grade of C+

2004 - 2015

KCPE, INGRID EDUCATION CENTER

Scored a total of 337 marks.

PROJECTS

I have done some projects and have built some websites and hosted them on Netlify.

MARCH 2024- JULY 2024

EMPLOYEE SELF-SERVICE “REQUISITIONS MODULE”

At Sunpro Systems Ltd, I have contributed to the development of an enterprise-grade Human Capital Management System. I worked on core modules such as Recruitment System, Staff Requisitions, Promotion Requisition, Contract Lifecycle, and Bank Change Requisition and currently working on the employee Onboarding process.. These modules were built using Blazor, MudBlazor, ASP.NET Core, and C#, with Dapper and MariaDB handling backend data access. I used Syncfusion for advanced UI components, and followed clean architecture with Domain-Driven Design. This system is used across multiple sectors and improves organizational HR operations including payroll, performance, and leave tracking.

MARCH 2024- JULY 2024

COMPANY JOB MANAGEMENT SYSTEM

This project I have built using Angular, Ejs, Hypertext Markup Language, Cascading Style Sheets,

Typescript, AngularJS, NodeJS, ExpressJS, Microsoft SQL Server and also implemented Redux and Docker. I have also incorporated a platform called Stuckbug for developers to ask questions and collaborate in working.

<https://github.com/FLAMES39/JobPortal>

JUNE 2023 - PRESENT

FLAMES PROPERTY MANAGEMENT SYSTEM

This project I have built using Hypertext Markup Language, Cascading Style Sheets, Typescript, AngularJS, NodeJS, ExpressJS, Microsoft SQL Server and also implemented Redux and Docker.

MARCH 2023 - MAY 2023

PROJECT MANAGER APP

I have used JavaScript, CSS, HTML languages and JSON for the database. This was a collaboration with my colleagues Joshua and Belinda.

STREAKS APP

I have used JavaScript ,JSON, CSS, and HTML languages.

<https://github.com/FLAMES39/Streak-app>

E-COMMERCE PAGE

Languages: JavaScript, CSS, HTML languages.

<https://earnest-speculoos-a67074.netlify.app/>

FAQS MAIL PAGE

Languages: JavaScript, CSS, HTML languages.

<faqsmail.netlify.app>

INSURANCE SERVICES

Languages: JavaScript, CSS, HTML languages.

<https://insurance-service-web.netlify.app>

TIME TRACKING DASHBOARD

<https://jolly-kringle-ae0632.netlify.app>

FLAMES WATER BILLING SYSTEM

Created to facilitate payment of water bills in apartments. It was my class project in school. As for this one I have not hosted yet.

The system is created by HTML,CSS, SQL for the database.

NEWS HOMEPAGE

<newspagechris.netlify.app>

SKILLS

- Hypertext Markup Language
- JavaScript
- TypeScript
- Express JS
- NodeJS
- Angular
- Redux
- Dockers
- Blazor
- .NET
- ASP .NET CORE MVC
- Entity Framework
- Dapper
- Syncfusion
- MariaDB
- C#
- Mudblazor
- **Cascading Style Sheets**
- API Integration
- Web Development
- Communication
- Git
- Gitlab
- Microsoft SQL Server.
- Figma
- Cloud, AWS
- Internet of Things CISCO Certificate
- Networking_Devices_and_Initial_Configuration CISCO Certification
- Operating_Systems CISCO Certification
- Introduction to Data Science CISCO Certification
- Networking addressing and Basic troubleshooting CISCO Certification
